EDUCATION

- Nanyang Technological University, Singapore** Aug 2019 – Jun 2023
- Bachelor of Engineering in Computer Science with Honours (CGPA: 4.85/5.00)
 - Specialization: Data Science and Artificial Intelligence
 - Dean's List Recipient in Academic Year 2020/2021
 - Relevant Modules: [1] Data Analytics and Mining [2] Software Systems Analysis and Design
- National University of Singapore, Singapore** Jan 2021 – Jun 2021
- Partook in the Singapore Universities Student Exchange Programme (SUSEP).

WORK EXPERIENCE

- Bank of America · Software Engineer II** Jul 2023 - Present
- Engineered post-trade regulatory reporting solutions using Python-based in-house language.
 - Automated workflows with cron jobs and streamlined deployments in OpenShift.
 - Resolved incidents and executed change management to ensure system reliability and accuracy.
 - Partnered with stakeholders to align compliance requirements with technical workflows.
- Bytedance · Big Data Engineer Intern** May 2022 – Aug 2022
- Spearheaded data scope chatbot integration in Java and Golang to aid authorization troubleshooting process.
 - Optimized download feature of analytical dashboard by introducing asynchronous flow with internal database as intermediate cache.
- Autodesk · Software Developer – Database Automation Intern** Jan 2022 – May 2022
- Designed CloudOS pipeline architecture – incorporating AWS services – to deploy Recovery Time Objective tool for DynamoDB using Terraform.
 - Incorporated Point-In-Time Recovery feature of DynamoDB to build Recovery Point Objective tool.
- Bonza · Data Engineer Intern** May 2021 – Aug 2021
- Orchestrated BigQuery data pipelines around the concept of direct acyclic graphs (DAGs) in Apache Airflow.
 - Commenced Grafana alerting dashboard to monitor anomaly behaviour in AWS and Google Cloud services.
 - Constructed Google Cloud Dataproc jobs using PySpark in the Hadoop File Distributed System environment.
- Psion Insights · Software Engineer Intern** May 2020 – Aug 2020
- Developed the foundation of a risk management system platform utilizing MERN stack.
 - Improved chatbot functionalities by creating intents using Amazon Lex.
 - Increased test coverage and documentation on APIs using Mocha.js and Swagger Editor.

ACADEMIC PROJECTS

- Facial-Recognition-Based Attendance Taking System: Advanced Software Engineering** Aug 2021 – Oct 2021
- Created a touchless attendance taking system using facial recognition in TensorFlow, Django, React.js, and PostgreSQL. Deployed in Google Cloud Platform.
 - Led a team of 7 in a scrum environment to maintain a scalable architecture of our scanner system.
- Gamified Teaching Software: Software System Analysis and Design** Jan 2021 – Apr 2021
- Established and tested a gamified teaching software using PostgreSQL, Express, React.js, and Node.js stack.
 - Led a team of 9 in an agile working environment to cater all client's functional requirement needs.

SKILLS

Languages: Bahasa Indonesia (Fluent), English (Fluent), Chinese (Basic), Korean (Basic)

Programming: C, C++, Python, SQL, Hadoop, Spark, Java, Golang, JavaScript, React.js, Node.js, Mocha.js, Django

Other skills: Adobe Illustrator, Adobe Photoshop, Adobe Premiere Pro, Amazon Lex, Microsoft Office, Tableau
